SUBJECT: Amendment of Nuclear Regulatory Commission
By-Product Material License Number 23-01544-09

Mr. Earl Wright
U.S. Nuclear Regulatory Commission
Region II
101 Marietta Street, Northwest
Atlanta, Georgia 30323

Dear Mr. Wright:

The U.S. Army Engineer Waterways Experiment Station
will have a need for the following gauge:

Manufacturer - Berthold Systems, Incorporated
Model - LB 387-1C massflow meter
Source - cesium 137
Maximum Activity - 1500 millicuries
that will be
possessed at one
time.

The gauge will be used to monitor and measure the
density of dredge slurry passing through a discharge
line of the Corps of Engineers dustpan dredge Jadwin.

The gauge will be leased from DWS International
Company, hereafter referred to as DWS. DWS personnel
will install and remove the gauge from the dredge
discharge pipe. As a part of the installation, DWS
personnel will give a safety briefing to all dredge
personnel and researchers who may, at times, be on the
dredge. At no time during its use will any Corps of
Engineers employees need to move or handle the gauge.

This amendment is needed as soon as possible so the gauge can be installed and used this dredge season.

All other conditions on the license will remain the same.

If you should have any questions concerning this amendment, please call Mr. John Lindigrin at telephone number (601) 634-2401.

Sincerely,

Jack R. Stephens
LTC, Corps of Engineers
Acting Commander and Director
