EA 89-197

Gentlemen:

This refers to the enforcement conference held on October 3, 1989 between our respective organization to discuss the Notice of Violation (NOV) sent to you on June 8, 1988, and your response dated July 24, 1989.

The purpose of the conference was to convey our concern that your response did not adequately address long term corrective actions to the violations and did not respond to our request for a description of the management oversight you would put in place to ensure NRC requirements are met in the future. The enclosed report summarizes the discussions.

In response to our request at the conference, you submitted a revised response to the NOV dated October 13, 1989. We have reviewed this response and determined it adequately responds to NRC's concerns for long term corrective actions and management oversight. We have also determined that this matter can be closed at this time, provided the program described in your response is incorporated into your license. Ms. Sandra Frazier will continue to work with you to see that this is done via your pending license renewal. We will review your implementation of this program during future inspections.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter and the enclosed report will be placed in the NRC Public Document Room.

If you have any questions on the above or the items discussed in the conference, please contact me at (312) 790-5612.

Sincerely,

Charles E. Norelius

Charles E. Norelius, Director
Division of Radiation Safety and Safeguards
