

NOV 16 1989

Docket No. 30-14765
License No. 43-11213-02

Universal Testing, Inc.
Attn: Melvin S. Mullikin, President
8740 N. Silver Spur Road
Park City, Utah 84060

Dear Mr. Mulliken:

This is to inform you that NRC Materials License No. 43-11213-02 issued to Universal Testing, Inc. on December 22, 1989, and which expired on February 28, 1989, is hereby terminated.

We note from a review of Universal's docket file that this license appears to have been used not only by Universal Testing, Inc., in whose name the license was issued, but also by Met-Chem Engineering Laboratories between 1980 and 1983 and Universal Testing Company of Utah from 1983 until expiration.

In accordance with NRC regulations, no such license shall be transferred, assigned or in any manner disposed of, either voluntarily or involuntarily, directly or indirectly, through transfer of control to any persons, unless the NRC, after securing full information, finds the transfer is in accordance with the Atomic Energy Act of 1954, as amended, and gives its consent in writing. We show no record of this having been done.

Because of the age of this apparent violation, no enforcement action is being proposed. However, you should note that such actions will be taken into consideration in any future licensing requests by Universal Testing, Inc.

Sincerely,

/s/
A. Bill Beach, Director
Division of Radiation
Safety and Safeguards
