SUMMARY

Scope:

This routine, unannounced inspection of the Physical Security program for Power Reactors was conducted specifically in the areas of Management Support; Security Program Plans; Protected and Vital Barriers; Detection Aids; Assessment Aids; Protected and Vital Area Access Control - Packages and Personnel; Keys and Locks; Alarm Stations; Communications; Security Training and Qualifications; and Security Organization.

Results:

In the areas inspected, no violations or deviations were identified.

Inspection results indicated that the Security Program continues to be effective in all aspects inspected and the security organization is capable of providing an acceptable level of protection for the station resources. Open Item Generic Letter 89-07 actions were reviewed and will be closed, see paragraph 2.
