Gentlemen:

This refers to the routine, unannounced radiation safety inspection conducted by Mr. Garcia of this office on November 6-8, 1989, of the activities authorized by NRC Source Material License SUB-1010 and to the discussion of our findings held by the inspector with members of your staff at the conclusion of the inspection. The inspector was accompanied during the inspection by Mr. A. W. Grella of the Office of Nuclear Material Safety and Safeguards. The enclosed NRC Inspection Report 40-8027/89-04 documents this inspection.

The November 6-8, 1989, inspection was an examination of the activities conducted under the license as they relate to radiation safety and to compliance with the Commission's rules and regulations and the conditions of the license. The inspection consisted of selective examination of procedures and representative records, interviews of personnel, and observations by the inspectors.

Within the scope of the inspection, no violations of NRC requirements were identified.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter and the enclosed inspection report will be placed in the NRC's Public Document Room.

Should you have any questions concerning this letter, we will be pleased to discuss them with you.

Sincerely,
