Gentlemen:

We have completed our review of your September 9, 1989 submittal concerning the contaminated diesel fuel currently being stored at the Bluewater Mill. Our review enables us to conclude that there is negligible risk associated with use of the diesel fuel and that contamination levels are below those specified in Appendix B to 10 CFR 20 for release to unrestricted areas.

The release of the fuel for use as a diesel fuel would be in accordance with NRC regulations and the conditions of your license. Should you have any questions, please contact Mr. Pete Garcia of my staff.

Sincerely,

Ramon E. Hall
Director
