SUBJ: Amendment No. 14, NRC License 12-10057-04, re letter dated 3/3/89 (Amending Byproduct Material Users)

1. The U.S. Nuclear Regulatory Commission, Region III, has forwarded the above license amendment to us: we send it to you for appropriate action.

2. Because some hospitals and individuals communicate with them directly, the staff of the NRC Directorate of Licensing has requested that all applications for licenses, renewal of licenses, and other matters germane to the use of radio-nuclides, be referred to our office initially rather than directly to them.

3. An occasional hospital sends in a single copy of its NRC request: an original and three copies should be submitted.

4. Please be assured of our earnest desire and readiness to assist you in problems pertaining to Nuclear Medicine.

JAMES W. FLETCHER, M.D.
Director, Nuclear Medicine Service
