

ENCLOSURE 1

NOTICE OF DEVIATION

B&W Fuel Company  
Commercial Nuclear Fuel Plant

Docket No. 70-1201  
License No. SNM-1168

The following deviation was identified during a Nuclear Regulatory Commission (NRC) inspection conducted on October 16-19, 1989.

Babcock and Wilcox Fuel Company's Commercial Nuclear Fuel Plant stated, in a letter to the NRC dated June 1, 1987, that a formal annual review and approval of the Emergency Plan (RCP) by appropriate management personnel will be established by August 1, 1987.

Contrary to the above, a formalized program governing the RCP review and approval by management had not been established. Therefore, the completion date of August 1, 1987 for implementation was not met.

Please provide to the U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, DC 20555, with a copy to the Regional Administrator, Region II, in writing within 30 days of the date of this Notice, the reasons for the deviation, the corrective steps which have been taken and the results achieved, the corrective steps which will be taken to avoid further deviations, and the date when your corrective action will be completed. Where good cause is shown, consideration will be given to extending the response time.

FOR THE NUCLEAR REGULATORY COMMISSION

Douglas M. Collins, Chief  
Emergency Preparedness and  
Radiological Protection Branch  
Division of Radiation Safety  
and Safeguards
