Re: Corrective Action Plan
License SUA-1473
Docket No. 40-8905

Dear Mr. Hawkins:

Quivira Mining Company resubmits the following Groundwater Corrective Action Plan in accordance with your letter dated July 26, 1989. This resubmittal has been prepared using the assistance of Mr. George Hoffman P.E., a geohydrologist consultant from Hydro-Engineering Incorporated.

The Corrective Action Plan is being resubmitted in its entirety. The plan includes specific information concerning issues raised at the meetings held at the Ambrosia Lake facility on July 19, 1989, and the meeting held March 23, 1989 at New Mexico Environmental Improvement Division (NMEID) offices in Santa Fe. It also addresses items discussed and requested during telephone conversations with Mr. Scott Grace of your staff on August 24 and September 11, 1989.

Quivira believes the information within this resubmittal contains the necessary program elements to meet NRC requirements for the mitigation of ground water impacts that exceed established protective concentration limits.
