Docket Nos. 50-206, 50-361, 50-362

Southern California Edison Company
P. O. Box 800
2244 Walnut Grove Avenue
Rosemead, California 91770

Attention: Mr. H. B. Ray, Vice President
Nuclear Engineering, Safety and Licensing Department

Gentlemen:

SUBJECT: NRC INSPECTION OF SAN ONOFRE UNITS 1, 2, AND 3

This refers to the routine, unannounced inspection conducted by Mr. C. Clark of this office on October 16-November 5, 1989, of activities authorized by NRC License Nos. DPR-13, NPF-10, and NPF-15, and to the discussion of our findings held by Mr. Clark with members of your staff on October 20, 1989.

Areas examined during this inspection are described in the enclosed inspection report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector.

While no violations or deviations were identified during the inspection, we have concluded that additional management attention is required to ensure that the San Onofre Commitment Register system (SOCR) efficiently functions to ensure timely resolution of NRC concerns. In several instances, the inspector noted that there has been a lack of attention to detail and timeliness on the part of licensee personnel responsible for following up on NRC identified concerns and there has been inadequate priority and resources assigned to resolve NRC identified concerns. The licensee has identified similar findings in audit report SCES-040-89, issued October 4, 1989. Specific concerns in this regard, are identified in the enclosed report.

In accordance with 10 CFR 2.790(a), a copy of this letter and the enclosure will be placed in the NRC Public Document Room.

Should you have any questions concerning this inspection, we will be glad to discuss them with you.

Sincerely,

Original Signed

D. F. Kirsch, Chief
Reactor Safety Branch
