Re: CAL 89-22

Mr. Cain:

In reply to the letter, reference #CAL 89-22, I wish to inform you that I understand the severity of operating without proper authorization in a NRC State. Operations were ceased at 5:00 pm on November 22, 1989. All Midwest Inspection trucks and radiographic exposure devices were removed from the State of Oklahoma.

We regret that this action had to be taken, but we also realize that we must operate within the rules set forth by the Nuclear Regulatory Commission.

As of 11-24-89, Midwest Inspection Services has begun steps to correct all areas of deficiencies brought to our attention during the visit from Jack Whitten and Vivian Cambell.

If we can be of further assistance please contact either Raymond or David Ezzell at our Perryton, Texas office.

Sincerely,

A handwritten signature in cursive script that reads "Raymond Ezzell". The signature is written in dark ink and is positioned above the printed name.

Raymond Ezzell
