Midwest Inspection Service, Ltd.  
ATTN: Mr. Don Paschen  
President  
3171 Gross Street  
P. O. Box 28023  
Green Bay, WI 54304

License No. 48-16296-01  
EA No. 89-234

Gentlemen:

This refers to the routine safety inspection conducted by Ms. T. L. Simmons of this office on October 11, 1989, of activities authorized by NRC Byproduct Material License No. 48-16296-01 and to the discussion of our findings with you at the conclusion of the inspection.

The enclosed copy of our inspection report identifies areas examined during the inspection. Within these areas, the inspection consisted of a selective examination of procedures and representative records, observations, and interviews with personnel.

During this inspection, certain of your activities appeared to be in violation of NRC requirements. You will be notified by separate correspondence of our decision regarding enforcement action based on the findings of this inspection. No written response is required until you are notified of the proposed enforcement action.

As discussed in the telephone conversation between you and Ms. T. L. Simmons and Mr. W. Reichhold of my staff on November 27, 1989, we will hold for an Enforcement Conference between members of our organizations on December 14, 1989 at 1:30 p.m. (CST) in the Region III office. We ask that you be prepared to discuss the following three issues:

1. The discrepancy between our findings and your records with regard to personnel field audits dated March 20, 1985 and October 3, 1985, conducted at Kewaunee Nuclear Power Plant.
2. The actions you plan to take to preclude further repetition of violation number 2 found during the October 11, 1989, inspection.
3. The apparent lack of responsiveness to NRC inspection activities, as discussed in Section 16 of the inspection report.

A court reporter will be present during the discussion of item 1 above.
