Denver, CO 80225

Dear Ed,

Enclosed for your review is the Durango Dewatering Pumping Test Data Package as of September 29, 1989. Drawdown continues in all piezometer/monitor wells except for MW7, in which no change has occurred. Total flow rate for all 17 wells is averaging 3.5 gpm with roughly 518,000 gallons pumped to date.

Should you have any questions, please contact Elizabeth Damler of my staff at (505) 846-1224.

Sincerely,

Mark L. Matthews
Acting Project Manager
Uranium Mill Tailings Project Office
