Gentlemen:

This refers to the inspection conducted by Messrs. M. E. Murphy, W. C. Seidle, and D. L. Kelley of this office during the period November 14-15, 1989, of activities authorized by NRC Construction Permit CPRR-123 for the University of Texas TRIGA Mark II Research Reactor, and to the discussion of our findings with Dr. T. Bauer at the conclusion of the inspection.

Areas examined during the inspection included component and system check-out and evaluations, preoperational testing, and schedule status. Within these areas, the inspection consisted of selective examination of representative records, interviews with personnel, and observations by the NRC inspectors. The inspection findings are documented in the enclosed inspection report.

Within the scope of the inspection, no violations or deviations were identified.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

Original Signed By:  
Samuel J. Collins
