BRANCH

Secretary: 12/1/89
I have been alerted that in accordance with 1986 deregulation of "low-level" radioactive waste, the EPRI is expected to apply for deregulation of 1/3 of commercial nuclear power plant waste AS BRC (10 millirem/yr. of radioactivity).

I am opposed to this since enough is not known in my estimation about the effects, particularly the synergistic effects with chemicals in and around ~~the~~ sites.

Thank you for your attention.

Sincerely,
Jo Higgins
