Docket 50-2
License R-28

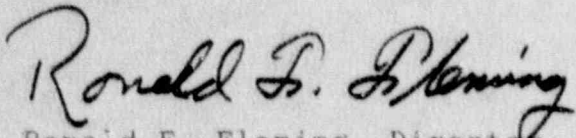

United States Nuclear Regulatory Commission
Document Control Desk
Washington, D.C. 20555

Gentlemen:

Enclosed for your review and approval is Revision 2 to the Ford Nuclear Reactor Qualification Program. Revision 2 covers a significant change in Section 2.2 on page 1. The word all has been deleted from the sentence that previously read "The evaluation of the reactor shall be performed on all abnormal and emergency conditions." The deletion permits us to conduct testing on a limited number of specific areas. The modification was approved by the NRC Inspection team that inspected the Ford Nuclear Reactor on October 1-14, 1989.

Additional updates have been made to Sections 2.4, 2.5, 2.6, 3.3, and 3.5 to reflect the technical Specification change of the Reactor manager's title to Nuclear Reactor Laboratory Manager.

Sincerely,

Ronald F. Fleming, Director
Michigan Memorial - Phoenix Project
