Secretary US NRC  
Washington, D.C. 20555

Good day,

I do mind being exposed to waste  
(chemical, radioactive, mixed, BRC's...).

Please consider and act upon slowing  
down production of the generating of these  
wastes and keep your standards high.  
Low level / high level / BRC's - all expose  
dangers to US citizens and to the  
world.

Until a SAFE (not WIPP - not  
incineration) method of storage is  
invented I urge production to halt.

Thank you,  
Emmy Kogonen
