Hayel

Director, Nuclear Reactor Regulation
Att Mr Dennis M Crutchfield, Chief
Operating Projects Branch No 5
US Nuclear Regulatory Commission
Washington, DC 20555

DOCKET 50-155 - LICENSE DPR-6 -
BIG ROCK POINT PLANT - SEP TOPICS
III-10.A, V-11.A, VIII-3.B, VI-7.C.1,
VIII-2 AND VIII-4 RESPONSE

- References:
- (1) DMCrutchfield letter to DPHoffman dated July 1, 1980
 - (2) DMCrutchfield letter to DPHoffman dated July 3, 1980
 - (3) DMCrutchfield letter to DPHoffman dated August 20, 1980
 - (4) DMCrutchfield letter to DPHoffman dated August 28, 1980

References (1) through (4) transmitted current NRC evaluations of the referenced (Big Rock Point) SEP topics to Consumers Power Company for review. These topics are III-10.A - "Thermal Overload Protection for Motors of Motor-Operated Valves", V-11.A - "Electrical, Instrumentation and Control Features for Isolation of High and Low Pressure Systems", VIII-3.B - "DC Power System Bus Voltage Monitoring and Annunciation", VI-7.C.1 - "Independence of Redundant Onsite Power Systems", VIII-2 - "Onsite Emergency Power Systems - Diesel Generator" and VIII-4 - "Electrical Penetrations of Reactor Containment". All of the letters required that comments be provided to the NRC within 45 or 60 days of receipt. A preliminary review indicates that Consumers Power Company will have substantive comments on several of these evaluations.

However, manpower limitations resulting from our work on Electrical Equipment Qualifications have prevented us from developing detailed comments by the dates requested. This manpower limitation will continue for the next two months. We, therefore, do not expect to provide responses to the referenced letters before early December, but will transmit prior to December 31, 1980.

David P Hoffman
Nuclear Licensing Administrator
