In the Matter of
Portland General Electric Company, et. al.
(Trojan Nuclear Plant)
Docket No. 50-344 (Control Building)

Gentlemen:

By their letter dated July 3, 1980, the NRC Staff requested Portland General Electric Company to supply information concerning masonry wall design in response to IE Bulletin 80-11. By letter dated July 7, 1980, counsel for the NRC Staff, Mr. Gray, forwarded that letter to the Licensing Board in this proceeding, with copies to this Appeal Board and the parties for information. Enclosed for the information of the Appeal Board and the parties is Licensee's response to that request.

Since this enclosure documents clearly and in one place the design criteria for all masonry walls, it discusses criteria for seismic loads considered by the Licensing Board in their Initial Decision (see Initial Decision, pp. 17-32, 35-36). This response is consistent with Licensee's submittals and testimony on the record in the Control Building proceeding, and therefore does not have any material impact on the Licensing Board's Initial Decision.

Sincerely,

Ronald W. Johnson

Director of Nuclear Reactor Regulation
ATTN: Mr. Robert A. Clark, Chief
Operating Reactors Branch No. 3
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Clark;

Attached is Portland General Electric Company's response to your letter dated July 3, 1980 in which you requested certain information related to IE Bulletin 80-11. Attachment 1 hereto contains the evaluation criteria for single and double wythe and composite masonry walls for consideration of in-plane and out-of-plane loads. Attachment 2 provides the requested description and justification of tornado loads for these walls. Attachment 3 provides Licensee's basis for concluding that a long-term confirmatory testing program is unnecessary at this time. Specifically addressed in that attachment are the items which you suggested should be considered in such a test program.

Please contact us if you have any questions concerning this response.

Sincerely,

Bart D. Withers
Vice President
