DOCKET NUMBER  
PROPOSED RULE **PR - Misc Notice  
Reg Guide**

SECRETARY OF THE COMMISSION  
U.S. Nuclear Regulatory Commission  
Washington, D. C. 20555  
U.S.A.

Att'n: Docketing and Service Branch.

Dear Sirs:

While studying your Regulatory Guide 1.57, "Design Limits and Loading Combinations for Metal Primary Reactor Containments System Components," it was realized that the twelve annotations to the Regulatory Position portion of the guide have no corresponding text within the four pages which our copy, seemingly complete, has. Since this original dates from June, 1973, and is the only version published so far, according to the latest Division 1 Table of Contents, we find no better explanation than assuming that there is an Appendix of some sort which contains these notes and which, somehow, we don't have.

Whatever is the case, we would very much appreciate any comments on this situation, and, if this Appendix is available, a copy of it. In the case that there is a revision or reprint of this guide, we would also thank you for making it available to us as soon as possible. We have contacted the U.S.G.P.O. for a complete set of the Guides, but since we know this will take a long time in arriving, we decided to approach you directly on this matter. We hope our request does not inconvenience you; any expense for the required copies may be charged to the:

Instituto de Investigaciones Electricas  
Apartado Postal 475  
Cuernavaca, Morelos, Mexico

U.S. NUCLEAR REGULATORY COMMISSION  
DOCKETING & SERVICE SECTION  
OFFICE OF THE SECRETARY
