

UNITED STATES NUCLEAR REGULATORY COMMISSIONDOCKET NOS. 50-286 AND 50-333POWER AUTHORITY OF THE STATE OF NEW YORKNOTICE OF ISSUANCE OF AMENDMENTS TO FACILITY
OPERATING LICENSES

The U. S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 32 to Facility Operating License No. DPR-64 issued to the Power Authority of the State of New York (the licensee), which revised Technical Specifications for operation of the Indian Point Nuclear Generating Unit No. 3 (the facility) located in Buchanan, Westchester County, New York, and Amendment No. 50 to Operating License No. DPR-59, issued to the Power Authority of the State of New York, which revised the Technical Specifications for operation of the James A. Fitzpatrick Nuclear Plant (the facility) located in Oswego County, New York. These amendments are effective as of the date of issuance.

The amendments change the organization charts and position titles and increase the membership of the Safety Review Committee (SRC) for both units. In addition, the amendment for Indian Point 3 deletes a redundant review for the SRC, increases to 60 days the review by the Plant Operating Review Committee (PORC) and approval by the Resident Manager of temporary changes to environmental procedures, and changes the definition of "operable."

The applications for the amendments comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has
