

Dear Sir:

I received my electric bill today. I was really upset. I called electric co, they gave me your address. They also said it was in your business to do some thing. As its out of their hands. How can a person live & pay bill like this on a fixed income. My electric bill was \$21.54, But why this energy cost of 14.10. After paying rent. How does a person buy food. Can you pay rent & an electric bill of 37.21 with an income of 309.30? Please let me know. We the old & poor people suppose to starve. I worked as long as I could.
