

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

ASIC (2)

August 29, 1980

Docket Nos. 50-213 and
50-245

Mr. W. G. Council, Senior Vice President
Nuclear Engineering and Operations
Northeast Nuclear Energy Company
Post Office Box 270
Hartford, Connecticut 06101

Dear Mr. Council:

SUBJECT: Environmental Qualification of Electrical Equipment
(Haddam Neck Plant and Millstone Nuclear Power Station Unit 1)

This letter transmits orders which require information to support the environmental qualification of safety related electrical equipment at Haddam Neck Plant and Millstone Nuclear Power Station Unit 1.

The Commission's Memorandum and Order of May 23, 1980 addresses safety related electrical equipment exposed to a harsh environment, inside or outside containment, resulting from an accident. The Orders require that all such equipment in operating reactors be fully qualified by June 30, 1982.

To complete this objective, you are required to submit, by November 1, 1980, all information to support a safety evaluation of the aforementioned equipment. If your facilities had an established commitment date before November 1, 1980, it is fully expected that your submittals will be not later than that commitment date. If your facilities' commitment date is past without a complete submittal, it is strongly recommended that actions be expedited since they have already impacted the staff review schedule.

Briefings were held with all interested licensees during the week of July 17, 1980. Enforcement actions relative to these Orders were discussed during these briefings.

Sincerely,

Dennis M. Crutchfield
Dennis M. Crutchfield, Chief
Operating Reactors Branch #5
Division of Licensing
