Director, Nuclear Reactor Regulation
Att Mr Dennis M Crutchfield, Chief
Operating Reactors Branch No 5
US Nuclear Regulatory Commission
Washington, DC 20555

DOCKET 50-155 - LICENSE DPR-6 -
BIG ROCK POINT PLANT - TECHNICAL SPECIFICATIONS
CHANGE REQUEST - AUXILIARY NEUTRON SOURCES

Attached are three (3) original and thirty-seven (37) copies of a request to change the Big Rock Point Technical Specifications.

The attached Technical Specifications change is required to allow new fuel bundles with center rod position auxiliary neutron sources to be used for the next operational cycle. Thus, issuance of an Amendment to Facility Operating License DPR-6 for Big Rock Point for this change is required prior to start-up (approximately 12/15/80) following the upcoming refueling outage. The proposed change removes detailed descriptions concerning the location of the auxiliary neutron sources within the core and fuel bundle. Justification for these changes is provided by the attached Technical Specifications change discussion.

The proposed change has been determined to be a Class III change, pursuant to 10CFR 170.22. A check in the amount of \$4,000 is attached.

David P Hoffman
Nuclear Licensing Administrator

CC Director, Region III, USNRC
NRC Resident Inspector - Big Rock Point
