Projects
Power Generation Group
P. O. Box 1289
Lynchburg, Virginia 24505

Gentlemen:

We have received your letter and enclosure dated March 14, 1977. Your letter detailed the revised Babcock & Wilcox Trainee Program for individuals who wish to establish eligibility to sit for license examinations at their facility prior to initial criticality, pursuant to Section 55.25(b) and (c) of 10 CFR Part 55.

The revised program consists of a twelve (12) week basic nuclear theory course, an eight (8) week nuclear power plant observation course, an eight (8) week simulator course utilizing the B&W Simulator, a four (4) week course on nuclear steam supply systems, and an on-the-job training program at the operating station.

Based on our review, your proposal and our observation of the personnel who have completed your present program, the revised program will continue to establish cold eligibility for individuals who successfully complete the trainee program.

Sincerely,

ORIGINAL SIGNED BY
E. E. COLLINS

Paul E. Collins, Chief
