Mr. Paul Collins
Chief, Operator Licensing Branch
U.S. Atomic Energy Commission
Washington, D. C. 20545

Dear Mr. Collins:

Enclosed is a copy of Babcock & Wilcox's proposed replacement operator training program for hot licensing candidates. I request that you review this program for its general content. This program appears to be highly desirable for Babcock & Wilcox customers, and we are interested in providing this type of service.

The classroom schedule is under review and development of outlines and slight modifications are expected to be made. You will be advised as to the final program that is developed.

Very truly yours,

N. S. Elliott, Manager
Nuclear Training
