George T. Frampton, Jr., Esq.
US Nuclear Regulatory Commission
TMI Special Inquiry Group, AR-400
Washington, D.C. 20555

Dear Mr. Frampton:

Supplementing my September 14, 1979 letter to you, the following additional materials are enclosed, which are in response to your letter of August 6, 1979 to G. L. Edgar, Esq:

Copies of data sheets received by or developed by B&W concerning pressurizer measurements and calculations made in determination of the size of the "hydrogen bubble" during the period of time from the start of the LcFW incident through April 2, 1979.

We trust that this submittal completes our action on the above referenced request.

Very truly yours,

J. G. Mullin/n
