

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D.C. 20555

DOCKET NUMBER  
PRCD. & UTIL. FAC. 50-3247, 286  
S+D

OFFICE OF THE  
COMMISSIONER

March 11, 1980

Mrs. Jo Levinson  
Jada Lane  
Greenwich, Connecticut 06830

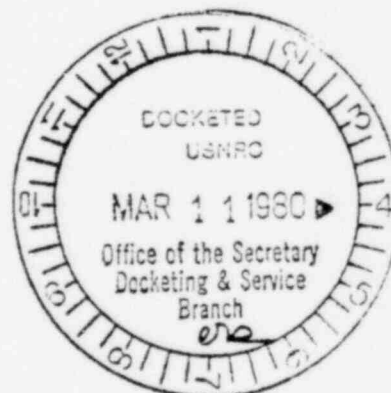

Dear Mrs. Levinson:

Thank you for bringing Anthony Parish's article on generating capacity to my attention. As I indicated in my separate views, I think that the need or absence of need for the power generated by the reactors located at Indian Point is one of the factors which the Commission should evaluate in determining whether these plants should be shut down pending completion of the hearings on their safety. In making this decision, the Commission should take a hard look at the degree of safety presently achieved by these plants and the existing public protection arrangements.

I appreciate your continuing interest in this matter.

Sincerely,

Victor Gilinsky  
Commissioner
