Dr. Glenn Seaburg
Chairman U.S. Atomic Energy Commission
Washington, D.C. 20545

Dear Dr. Seaburg:

I am a resident of Gratiot County presently living in Alma. I have read much of the controversy regarding the proposed nuclear power plant which Consumers Power Company has started construction on in the Midland area. In addition to this Consumers Power Company also has constructed a nuclear power plant on Lake Michigan, 35 miles west of Kalamazoo. They are unable to use this plant at the present time due to the hearing on their right to discharge heated water into Lake Michigan.

As an interested citizen I would like you to know that I am real interested in seeing both of these plants go into operation as soon as possible due to the present energy crisis that our nation is suffering from. I would appreciate it if you would do everything in your power to help.

Yours very truly,

F. D. McDonald
