Re: RII:JPO  
McGuire Nuclear Station  
Docket Nos. 50-369 and 50-370

Dear Mr. O'Reilly:

In response to your letter of April 4, 1980 which transmitted IE Bulletin 79-03A, we wish to advise that a review of McGuire Nuclear Station's piping specifications has been conducted. Duke Power Company has not used SA-312, A-312, Type 300 Series fusion welded pipe in safety-related systems at greater than 85 percent of Code allowable pressure stresses. No future use above this limit is planned.

Very truly yours,

  
William O. Parker, Jr.
