Docket No. 50-10

Gentlemen:

We understand, based on conversations with Mr. D. Butterfield of your company, that the General Electric Company Reports NEDE-20870, entitled "Evaluation of Dresden Nuclear Power Station 1 Boron Carbide Control Blades," and NEDE 10202 entitled, "Examination of Failed Dresden 1 B,C Filled Test Absorber Rods," are considered to be proprietary. The subject matter of these reports was a topic of a past inspection at the Dresden Unit 1 by our office. There still remains some followup reviews which this office wishes to make and which are dependent on the information in the reports. We request, therefore, copies of the reports be mailed to our office. If the reports should contain information which would be of interest to NRR, we would probably wish to send them copies. We will contact you with regards to our judgement in this matter prior to initiating any action. Thank you for your cooperation.

Sincerely yours,

G. Fiorelli, Chief
Reactor Operations and
Nuclear Support Branch
