Secretary of the Commission
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Attention: Docketing and Service Branch

Gentlemen:

I would like to offer two brief comments on Task OH9024
Division 8
May 1980

1. Re: p. 5 ¶ 1. It would be more correct to say the "Risk can be defined in general as the probability (chance)" of a negatively regarded consequence "resulting from [an event] or some activity".
2. Re: p. 23, line 3, the word radionuclide rather than radioisotope should be used.

Yours truly,

Arvin Lovaas
Health Physicist
