Mr. John Hearne
717 H. Street N.W.
Washington, D.C. 20555

Dear Mr. Hearne,

I would appreciate information on what is holding up the licensing of new nuclear plants. From what I can find there is great benefit to the country having nuclear power. I would be for opening nuclear plants as quickly as possible to help us be less dependent on foreign oil and having a cleaner environment.

I would appreciate any comments or statements you would have.

Yours truly,

David Beatty
