Dr. Joseph N. Hendrie:

I am a met-Ed customer & would like to lodge a complaint because you are taking too much time to decide that T. M. I. unit # 1 may produce electricity again. unit # 1 had one of the best on line records for producing electric in the world. Other Babcock - Wilcox units are producing electric, why pick on Penna?

President Carter says we should not import so much oil because of the balance of payments deficit. you might bankrupt met-Ed & my family if we must continue to buy out of state power.

Please tell met-Ed to start producing electric at T. M. I. unit # 1.

Thank you,  
George Albert
