Dear Mr. Volmer

well TMI strikes again. The  
gas inside the containment building  
at the unit 2 is supposed to  
be vented into the air more  
radioactive material will be put on  
the public.

You state the dose of radioactivity  
to the public would be very low.  
Just how much is very low? I want  
an answer! Also radioactive material  
was left loose at the initial  
accident & it's been reported more  
left loose recently. That to me is  
not very low or a little!

I can't understand how people  
like you & all the other responsible  
people for building these nuclear  
plants can sleep at night with  
the lies that have been told the  
public. You don't have to be an Einstein  
to see the gap between the lies on all  
these TMI contradictions of the Company  
Officers, the Governor, & the NRC

Senator Schweiker just  
had an amendment to, as he put it, back  
the NRC to control more tightly the  
training & licensing of nuclear plant  
personnel.

# POOR ORIGINAL

what needs to be done is to away  
with Nuclear Plants completely & no  
more build any more anywhere. Solar  
Wind, and Synthetic Fuels should  
be used in our future energy needs.

The waste alone is much to  
be aware of. No one! No one! I repeat  
what's it and I can say I don't blame  
them. What about future generations or  
is I assume you only thinking of  
today & yourselves.

Here attached are some reports  
on Nuclear power or don't you people read?  
Each bottom Nuclear plant near  
the Maryland - Pennsylvania border, that  
produces for Philadelphia Electric left loose  
radiation only a month ago. All this  
plus TMI accident and now you  
want to leave more into the atmosphere.  
This is not a little or very low.  
Mr. Volmer!!!

I'll put it front I bank all of you  
NRC and Electric officials responsible  
for these plants are LYING and the public  
is aware of it, but the public health  
and lives mean nothing to the people only the dollar  
sign.  
Not sure is a warning about the  
TMI accident but it's clear you people think  
you God. Was up before we have a catastrophic  
no chance shut.
