ZELL DRAZ
VICE PRESIDENT

August 14, 1979

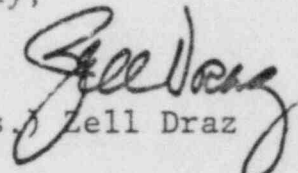

Dear Mr. Kennedy,

I simply couldn't believe the announcement that TMI is planning to vent radioactive gases into the atmosphere over a thirty day period.. but ofcourse the doses would be "safe." What is going on with your group? NRC has gone on record that there is no safe dose of radioation..

I urge you to stop this immediately.

Thank you for your consideration.

Sincerely,

(Mrs.) Zell Draz
