

September 4, 1980

Dr. Denwood F. Ross, Jr., Director
Division of Systems Integration
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Dr. Ross:

The Combustion Engineering Designed Plants Owners Group on Post TMI Efforts was disbanded on June 23, 1980. At the same time, a new owners group was organized to address itself to generic engineering, licensing and operational issues identified by the owners. The new group also undertook completion of projects still in progress that had been organized by the former TMI owners group without authorizing additional funding.

The new owners group instructed me to advise you of the change in scope of the group and request that future requests for information be addressed to the appropriate licensee and/or applicants. A determination would then be made by the recipients as to the need for owners group action.

At the August 14, 1980 meeting, the new CE Owners group elected Mr. Kenneth P. Baskin, Manager, Generation Engineering for the Southern California Edison Company, Chairman replacing George Liebler who is shortly retiring.

Mr. Baskin's address is: Kenneth P. Baskin
Southern California Edison Company
P.O. Box 800
2244 Walnut Grove Avenue
Rosemead, California 91770

and his telephone number is (213) 572-1401.

It has been a pleasure working with you and your staff and if I can be of any assistance to you, please do not hesitate to call me.

Very truly yours,

George E. Liebler
