CYCLE 4 POWER DISTRIBUTION COMPARISON

In the District's letter to Mr. Robert W. Reid, dated February 27, 1980, we committed to perform Power Distribution Comparisons through Cycle 4 as a result of this being our first reload core utilizing Lumped Burnable Poisons.

As of August 31, 1980, Cycle 4 Burnup stands at 83.8 EFPD. Hence, there is no analysis to report since that which was obtained at 50 EFPD and reported in July, 1980.

The next data is to be taken at near 100 EFPD, which is anticipated to occur in September, 1980.
