

## UNITED STATES NUCLEAR REGULATORY COMMISSION WASHINGTON, D. C. 20555

AUG 27 1980

General Electric Company ATTN: Mr. D. M. Dawson, MC-861 175 Curtner Avenue San Jose, CA 95125

## Gentlemen:

Enclosed is Certificate of Compliance No. 9001, Revision No. 10, for the Model No. IF-300 shipping container. This certificate supersedes, in its entirety, Certificate of Compliance No. 9001, Revision No. 9, dated December 10, 1979.

Changes made to the enclosed certificate are indicated by vertical lines in the margin.

Those on the attached list have been registered as users of this package under the general license provisions of 10 CFR §71.12(b) or 49 CFR §173.393a.

This approval constitutes authority to use the package for shipment of radioactive material and for the package to be shipped in accordance with the provisions of 49 CFR §173.393a.

Your Quality Assurance Program Approval For Radioactive Material Packages, Approval No. 0004, issued October 5, 1979 is your approved quality assurance program, not Section XI, Quality Assurance and Testing, of this application. Subsection 2.3, Items Classified as Critical to Safety, of Section XI, is incomplete because it does not address containment, shielding and criticality. We consider all tems shown on the packaging drawings as critical to safety of this package design.

Sincerely,

Charles E. MacDonald, Chief
Transportation Certification Branch

Division of Fuel Cycle and

Material Safety

Enclosure: As stated

cc: w/encl

Mr. Richard R. Rawl

Department of Transportation
