Commonwealth Edison Company

72 WEST ADAMS STREET * CHICAGO, ILLINOIS 60600

Dresden Nuclear Power Station
R. R. #1
Morris, Illinois 60450
November 1, 1966

Mr. Peter A. Morris, Director
Division of Reactor Licensing
U. S. Atomic Energy Commission
Washington, D. C. 20545

Dear Mr. Morris:

Dresden Station has been operating at reduced output, 160 MWe, since October 14, 1966, in order to minimize the radioactive off-gas release rate. Another step towards minimizing off-gas release was to terminate the monthly control rod worth testing with the completion of the September test. Since your staff is familiar with our control rod testing and load scheduling, we want to keep you informed on changes in these areas.

We terminated the monthly rod worth testing near the end of fuel cycle #3, September, 1964, for the same reason. Refer to the letter to Mr. R. L. Doan, dated December 8, 1964.

Dresden Station's operation remains within the limits set forth in the Operating License DPR-2 and its associated technical specifications.

Sincerely yours,

H. K. Hoyt
