Gentlemen:

The enclosed Notice of Proposed Issuance of Amendments to Facility Operating Licenses for the Dresden Nuclear Power Station Units 1, 2, and 3 has been filed with the Office of the Federal Register for publication. The notice relates to our consideration of the addition of interim surveillance requirements to the Technical Specifications for the Dresden Nuclear Power Station Units 1, 2, and 3 pending completion and acceptance of certain modifications to the facilities to assure that they will withstand the consequences of postulated ruptures in the high energy fluid piping outside containment without loss of capability to achieve and maintain safe shutdown of the facilities. This proposed action is based on our letters to you dated December 15, 1972 (Unit 1), and December 14, 1972 (Units 2 and 3), and your report dated March 5, 1974 for Dresden Unit 1 and report dated January 23, 1974 and Supplement 1 to the report dated March 22, 1974 for Dresden Units 2 and 3, on the subject of postulated pipe failures at the Dresden Nuclear Power Station Units 1, 2, and 3.

Sincerely, HJMCalduff, ROR
