

DOCKET NUMBER PR 50,51,100,329 Lake Dr
PROPOSED RULE 45 CFR 50.39 Charlotte NC 28215

Secretary of the Commission
US Nuclear Regulatory Commission
Washington DC 20555

Attention: Docketing and Service Branch

I understand you have proposed amendments to your regulations on reactor siting to isolate them for safety reasons.

Reactors are proven safe and associated technologies are improving almost daily. All industry is over-regulated now, especially the nuclear industry, and I feel siting is quite sufficient.

Very truly yours,
Betty H Walker
