Docket No. 50-151

Docket No. 50-356

Based on the inspection conducted on August 19 and 20, 1980, it appears that certain of your activities were in noncompliance with NRC requirements as noted below. This item is a deficiency.

49 CFR 173.395(a)(1) requires, in part, that each shipper of specification 7A packaging maintain certification and safety analysis demonstrating that the container meets specification 7A.

Contrary to this requirement, no certification and safety analysis is maintained.
