The Nuclear Engineering Company (NECO) site at Hanford, Washington is one of the four sites which received LLW for disposal during the calendar years of 1978 and 1979. The file shall include any other information accompanying the records that may provide further specific information about particular waste shipments (e.g., the date of receipt, the type, quantity and form of radioactive material received, the originator, the originating city, the shipping distance, and the type of package in which the radioactive material was shipped). Other information which would help NRC in understanding and interpreting the records shall also be included in the file.
