NOTICE OF ISSUANCE OF AMENDMENT TO LICENSE

The U. S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 3 to License No. DPR-75, issued to Public Service Electric and Gas Company, Philadelphia Electric Company, Delmarva Power and Light Company and Atlantic City Electric Company (the licensees), which revised Technical Specifications for operation of the Salem Nuclear Generating Station, Unit No. 2 (the facility) located in Salem County, New Jersey. The amendment is effective as of the date of issuance.

The amendment deletes the requirement for Public Service Electric and Gas Company to plug certain tubes in the steam generators prior to exceeding 5 percent power, approves an organizational change to establish a new Radiation Protection Department, and revises the Technical Specification concerning High Radiation Area.

The applications for the amendment comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since this amendment does not involve a significant hazards consideration.
