Since none of you so-called experts seem to be sure what is really wrong at TMI nor how to correct it — and further since no one seems to really know what deleterious and even dangerous results this type of plant can cause in adults, more important — in children, and even in plants & animals, it would seem only common sense to abandon it & build a conventional plant. & stop worrying about Met Ed & their parent Co. — those guys will make out-hesure! Think R. Benstead Law Justice
