Mr. Charles MacDonald, Chief
Transportation Branch
Division of Fuel Cycle and Material Safety
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Subject: Certificate of Compliance 6347; Renewal Request.

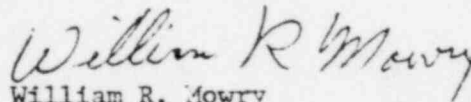

Dear Mr. MacDonald:

General Atomic Company (GAC), manufacturer of HTGR reactors and fuels, requests renewal of the subject certificate of compliance for a period of five (5) years. The certificate covers the FSV-3 packaging which is used to safely transport HTGR fuel elements primarily from GAC to a HTGR Reactor at Fort St. Vrain, Colorado. Attached is a check for \$150 covering the renewal fees prescribed in 10 CFR 170.31.

We request renewal of the subject certificate of compliance without submission of a consolidated safety analysis since widespread use of the package is not contemplated. Only GAC and possibly the Public Service of Colorado, if return of a fuel element to GAC is found necessary, are anticipated users of the package.

We look forward to your issuance of the renewal as requested. Should you have questions about the matter, please contact the undersigned at 714-455-2823.

Very truly yours,

William R. Mowry
Licensing Administrator
Nuclear Materials Control Division

WRM:hcs

Attachment: Check for \$150.
