Subject: Korea Nuclear Fuel Export License Application for KNU 7 and 8

Gentlemen:

We hereby apply for an export license for the supply of nuclear fuel for the Korea Electric Co. KNU 7 and 8 utilization facilities for which plant license XR-133 was issued September 22, 1980.

The location of KNU-7 and KNU-8 is on Gyaeme, on the southwest coast of Korea located approximately 34 miles northwest of Gwangju City, which is the capital of Chunnam Province. The exact location is latitude of 35°-24.3 sec. north and longitude of 126°-24.6 sec. east.

In order not to interfere with Eximbank financing arrangements with the customer, and to further enhance the U.S. image abroad as a reliable supplier, we request this application be processed within the statutory time limits, including evoking of the "no material changed circumstance" provision.

We remain strongly dedicated to "life-of-plant" fuel supply licenses, however, in order not to cause a delay in the issuance of this license we have limited our request to be consistent with the time frame previously approved for KNU 5 and 6 license XSNM-1458, issued April 23, 1980.
