Trojan Nuclear Plant  
Docket 50-344  
License NPF-1

Mr. Darrell G. Eisenhut, Director  
Division of Licensing  
Office of Nuclear Reactor Regulation  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Dear Mr. Eisenhut:

Attached is a report on the Trojan Nuclear Plant Emergency Response Facilities which provides a description of the Technical Support Center (TSC), Emergency Operations Facility (EOF) and Safety Parameter Display System (SPDS) for the Trojan Nuclear Plant. This report is submitted in response to the NRC letter of September 5, 1980 "Preliminary Clarification of TMI Action Plan Requirements", which requires licensee's submittal of the information and description of the Emergency Response Facilities by January 1, 1981.

Draft report NUREG-0696 issued in August 1980 was considered in the design of Trojan Emergency Response Facilities where possible. In this regard, the SPDS and TSC/EOF instrumentation systems had already been procured and were in advanced stages of design and fabrication at the time draft NUREG-0696 was issued in August 1980.

It is currently planned that the TSC and the EOF will be operational by April 1, 1982, and the SPDS by January 1, 1982.

Sincerely,

Bart D. Withers  
Vice President  
Nuclear

c: Mr. Robert A. Clark, Chief  
Operating Reactors Branch No. 3  
Division of Licensing  
U. S. Nuclear Regulatory Commission

Mr. Lynn Frank, Director  
State of Oregon
