Power**
CORPORATION

October 24, 1980

Director
Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Subject: Crystal River Unit 3
Docket No. 50-302
Operating License No. DPR-72
Technical Specification Change Request No. 17

Dear Sir:

As part of Florida Power's review of outstanding Technical Specification Change Requests we have identified TSCR No. 17 as an inactive item. The Staff, by letter dated November 11, 1979, requested submittal of a Technical Specification Change Request on Reactor Vessel Overpressure Protection (Overpressure Mitigation System) for Crystal River 3 as well as other PWR's. Florida Power responded to that request by letter dated January 23, 1978.

On June 20, 1979 (eighteen months later) the Staff answered with additional questions and a draft standard technical specification. Florida Power once again responded to the Staff request and submitted Revision 1 to TSCRN 17 on August 2, 1979.

As no action has been, Florida Power respectfully withdraws Technical Specification Change Request No. 17 in its entirety.

Very truly yours,
FLORIDA POWER CORPORATION

Ronald M. Bright
Acting Manager
Nuclear Support Services Department
